# Walk-In Coolers and Freezers

Need a special size walk-in? Glass doors? An outdoor application?

Whatever your need, we will help you plan and design your walk-in cooler or freezer. Call us with the answers to the following questions and we will help you get the best walk-in to meet your needs:

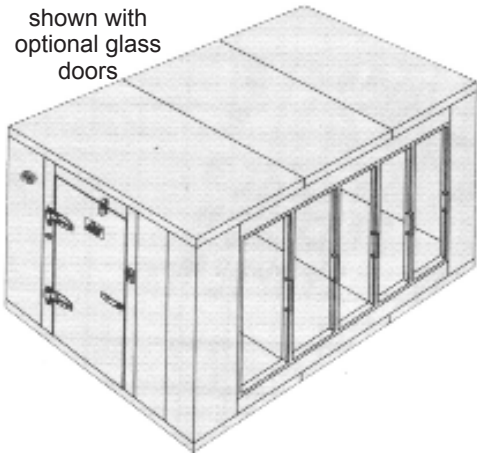

**NOTE: Specially sized walk-ins often require 3 to 6 weeks lead time.**

1. What will be the size of the unit (width, depth and height)? Please provide us with a drawing, as at right:
2. Will this be an indoor or outdoor unit?
3. Will the refrigeration be indoor or outdoor?
4. What type of floor will be under the unit (eg. concrete or wood)?
5. If indoor, will the unit be located on the ground floor of the building? If so, is there a basement under the floor? If not, on which story will it be located?
6. What types of products will you be storing in the unit? How much of each product? What are the temperatures of these items before placing them in the walk-in?

Other layouts available. Fax us a diagram of what you have in mind.

shown with optional glass doors

## GLASS DOORS for Walk-In Coolers

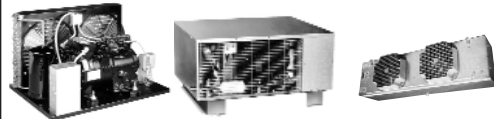

- ✓ Indoor or Outdoor Models.
- ✓ 26 gauge stucco embossed coated steel panels.
- ✓ Smooth aluminum interior floor.
- ✓ Standard access entryway door.
- ✓ Vapor proof light. ✓ Dial thermometer.
- ✓ Double sweep bottom gasket for coolers without floor.
- ✓ Foamed-in-place urethane insulation.
- ✓ Doors with hermetically sealed double glass panes and door heaters.
- ✓ Frames and frame heaters included.
- ✓ Anodized aluminum frame and door trim with choice of Gold or Silver finish
- ✓ Double vinyl gaskets are positioned on the door and give a 100% perimeter seal.
- ✓ Self-closing doors with heavy pulls.
- ✓ Fluorescent lighting on both sides of every door.
- ✓ Adjustable standard shelving allows level to 15° tilt position.
- ✓ 1 1/4" price tag molding.
- ✓ White epoxy coated shelving.

### Refrigeration Systems

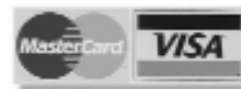

#### Selecting the proper refrigeration system for your walk-in cooler or freezer

Give us the product load, location of equipment and voltage. We can size the system properly for medium temperature, low temperature and ice cream storage. Indoor and outdoor applications available.
